

Spex Welcomes NSI Lab Solutions...the Best Just Got Better!

We are pleased to announce the acquisition of NSI Lab Solutions.

Founded in 2000, and based in Raleigh, NC, NSI Lab Solutions is an accredited proficiency testing provider for life sciences, food/agriculture, environmental, and pharmaceutical testing segments.

Spex has been the first choice for analytical laboratories around the world for standards, certified reference materials, and sample preparation equipment since 1954. Over the past few years, our product offerings have grown to include chromatography, spectroscopy, and molecular biology equipment and supplies. We always strive to give our customers the best quality and selection of products. Now the best is getting better with the addition of NSI Lab Solutions to the Spex family.

Spex organic standards and solutions will be joined by the extensive catalog of organic proficiency testing and matrix-based standards provided by NSI Lab Solutions.

The offering of Spex inorganics and spectroscopy standards will be enhanced by the addition of NSI Lab Solutions' inorganic PTs, soil, and other matrix-based standards.

Our newest product line of molecular biology products for PCR and microbiological testing will be joined by all the necessary biological controls and standards found in the NSI Lab Solutions' catalog, making Spex your best source of all the standards and supplies you need for your chemical and microbiological analyses!

What does the acquisition of NSI Lab Solutions mean for you?

You now have access to all of NSI Lab Solutions products.
